

Mouad Matioui

Cybersecurity Graduate | Emerging Technology & Digital Resilience | Security Governance
London, UK | +44 7831517944 | matiouimouad9@gmail.com | [in linkedin.com/in/mouad-matioui](https://www.linkedin.com/in/mouad-matioui)

Profile

Cybersecurity graduate and practising security engineer with hands-on experience in information security governance, regulatory compliance (ISO 27001, GDPR), AI risk assessment, and the protection of critical financial infrastructure. Final year research examined next-generation VPN protocols and post-quantum cryptography readiness, an emerging-technology security question with direct relevance to national and organisational digital resilience planning. Brings a technical practitioner's perspective, developed across a graduate engineering role in fintech and an industrial placement in cybersecurity and compliance, to the interdisciplinary study of security, intelligence, and strategic studies.

Certifications

ISO/IEC 27001 Lead Auditor (Information Security Management Systems) [CONFIRM DATE]
[CONFIRM ISSUING BODY, e.g. PECB, BSI, IRCA]

- Certified to lead audits of information security management systems against the ISO/IEC 27001 standard, covering risk assessment, security governance, and regulatory compliance, skills applied directly during ISO 27001 and GDPR audit preparation at Immunocore.

Experience

Graduate Engineer Jun 2026 to Present
LMAX Group London, UK

- Automate security controls and configuration hardening across cloud infrastructure using Infrastructure as Code (IaC), strengthening the digital resilience of financial-sector critical infrastructure.
- Support secure migration of infrastructure and trading systems to the cloud, embedding security requirements into large-scale technology transformation.
- Assess risk in emerging AI/ML systems and data pipelines as part of the organisation's AI security programme, engaging directly with the security challenges posed by artificial intelligence.
- Apply security governance practices aligned with fintech regulatory and risk requirements, contributing to the protection of critical financial infrastructure.

AI Junior Solutions Analyst (Part-time) Sep 2025 to Mar 2026
Immunocore Remote, UK

- Assessed data governance and access-control risk within AI training pipelines, examining how emerging AI technologies create new information security exposures, while collaborating with data scientists and IT engineers to fine-tune internal models, improving predictive accuracy by more than 30%.
- Documented model behaviours and technical processes to strengthen transparency, reproducibility, and audit readiness, supporting organisational compliance and risk governance.
- Presented security and risk considerations on AI-driven digital transformation to project stakeholders, translating technical risk into decision-relevant analysis.

Technology Placement Student (Full-Time) Sep 2024 to Sep 2025
Immunocore Oxford, UK

- Rotated across Cybersecurity, Infrastructure, Compliance, and Project Management functions, contributing to over 6 initiatives that strengthened organisational security and system resilience.
- Supported system administration and access control, including Active Directory management, endpoint monitoring, and user access provisioning for 700+ employees, underpinning day-to-day information security operations.
- Assisted in compliance documentation and audit preparation aligned with ISO 27001 and GDPR standards, ensuring 100% audit readiness and building practical experience directly relevant to information security governance and regulatory compliance.

- Developed automation scripts using Python, PowerShell, and Microsoft Graph API to streamline user onboarding, data reporting, and system maintenance, saving an estimated 50% in manual workload.

Teaching Assistant (Part-time)

Oct 2023 to May 2024

University of Hertfordshire

Hatfield, UK

- Achieved the highest mark in the cohort (95%) in From Silicon to C, demonstrating strong understanding of assembly language, C programming, and low-level computer architecture.
- Invited by the module lecturer to serve as Teaching Assistant for first-year students based on this performance.
- Supported practical lab sessions and communicated technical material to a diverse cohort of first-year students.

Customer Assistant (Part-time)

Jul 2022 to Sep 2023

Tesco

Hatfield, UK

- Assisted customers and provided efficient, friendly service across the shop floor.
- Restocked shelves and maintained store presentation to brand standards.

Education

BSc (Hons) Computer Science (Cyber Security and Networks), First Class (4.06 CGPA) Oct 2022 to May 2026

University of Hertfordshire

Hatfield, UK

- Final year project: A Comparative Analysis of Next-Generation and Legacy VPN Protocols, benchmarking WireGuard and OpenVPN on security, performance, and latency, and assessing post-quantum cryptography readiness, an emerging-technology security question of direct relevance to critical infrastructure and digital resilience planning.
- Core areas of study: network security, systems security, cryptography, digital forensics, security compliance, and secure cloud.

French Baccalaureate Diploma in Math and Economics (87%)

Sep 2018 to June 2021

Morocco

Voluntary Experience

Student Representative

Sep 2025 to Present

University of Hertfordshire

Hatfield, UK

- Act as the key liaison between 60+ students and academic staff, gathering feedback and presenting course related issues to faculty committees.
- Facilitate meetings and communicate student insights to improve teaching quality and engagement within a diverse, international student cohort.

Futsal Club Member

Oct 2022 to Present

University of Hertfordshire

Hatfield, UK

- Represent the university in competitive futsal matches, building teamwork, discipline, and strategic communication in a fast paced environment.
- Collaborate with teammates to plan training sessions and coordinate logistics for tournaments and fixtures.

Skills

Security and Governance: Information Security Governance, Regulatory Compliance (ISO 27001, GDPR), Risk Assessment, AI/ML Security, Network Security, Cryptography, Digital Forensics

Technical: Python, PowerShell, SQL, Microsoft Graph API, Windows Server, Azure, Infrastructure as Code (IaC), Cloud Migration

Communication and Cross-cultural: Cross-cultural Communication, Analytical Thinking, Problem-Solving, Teamwork, Adaptability, Time Management

Languages: English (Fluent), French (Fluent), Arabic (Fluent)
